

VTC Client Software

To install the Polycom CMA Desktop application for internal use from the email link provided

Pre-requisites: PC needs to be verified that it meets minimum requirements before installation. You must have Camera, Speakers, and a UHMC account.

1. Connect a webcam to your computer and install the camera software using the instructions received with the webcam. If you already have a camera installed skip this step.
2. Click the link provided in this email.
http://www.polycom.com/support/video/cma/cma_desktop.html

Select Polycom CMAD System v5.1.0 from the list
3. Click Save the software to your local system, and then double-click the file CMADesktop_5_1_0_0060.tar to unzip. You should now have a folder CMADesktop_5_1_0_0060. Double click the file CMADesktop. And click Run.
4. Follow the instructions to install the software. Skip Step 6 if you are a local user
5. When prompted for the server location, select Specify and enter the following IP address: 129.49.142.125. When the installation program is complete, the Polycom CMA Desktop client starts.
6. Installations that are performed on Remote locations (e.g. Home), when prompted for server location enter the following IP address: 129.49.170.155
7. You will be asked if you would like to sign in using your network login credentials to sign in to Polycom CMA desktop. Click "Yes" to use your network credentials.
8. When the installation program is complete, the Polycom CMA Desktop client starts. Click the Sign in field. Once the system signs you in, you're ready to connect to anyone else using Polycom CMA Desktop or other video endpoints systems.
